

ShopEase Seller Policy

1. Seller Onboarding

New sellers must complete identity verification, provide valid business information, and accept the ShopEase seller agreement before listing products.

2. Product Listings

Sellers must provide accurate product titles, descriptions, images, prices, dimensions, and applicable warranty information. Misleading claims and duplicate listings are prohibited.

3. Seller Cancellation

Sellers are expected to maintain sufficient inventory. Repeated seller-initiated cancellations may reduce seller performance scores and can result in temporary selling restrictions.

4. Returns

Sellers must comply with the return eligibility rules applicable to each product category. Sellers are responsible for processing approved returns within the prescribed operational timeline.

5. Seller Performance

Seller performance is evaluated using cancellation rate, late shipment rate, order defect rate, customer complaints, and policy compliance.

6. Policy Violations

Serious or repeated violations may result in warnings, listing removal, temporary account restrictions, or account suspension depending on severity and history.
